

# Leading Experts of Bone Regeneration

## A Comprehensive Course on Complex Ridge Augmentation and Complication Management

### Course Schedule

see [www.learnVISTA.com](http://www.learnVISTA.com) for schedule

**Saturday, February 28, 2026**

**Sunday, March 1, 2026**

**8:00 AM - 5:00 PM**

**(16 CE Units)**

Tara Aghaloo

Sasha Jovanovic

Bach Le

Homa Zadeh

### Course Description:

This advanced-level course is designed for clinicians experienced in bone grafting who want to expand their skills to address severe ridge deficiencies, complex anatomical challenges, and management of complications. The program emphasizes advanced regenerative strategies, integration of biologics, digital technologies, and minimally invasive techniques to enhance predictability in challenging clinical scenarios.

Through lectures by leading experts of bone regeneration, hands-on workshops, and live surgery, participants will gain in-depth knowledge and practical skills to manage complex horizontal and vertical augmentation, advanced GBR protocols, and soft tissue integration for long-term implant success.

### Educational Objectives:

- Advanced diagnosis and classification of severe ridge deficiencies
- Risk assessment and complication management in regenerative procedures
- Advanced GBR protocols for vertical and horizontal ridge augmentation
- Utilization of biologics, autogenous grafts, and advanced biomaterials
- Digital technologies: CAD/CAM meshes, 3D planning, and guided surgery
- Innovative flap designs for complex regenerative procedures
- Prevention and management of graft and membrane exposure
- Integration of soft tissue augmentation with regenerative protocols

Saturday February 28, 2026		
Pacific Time	Speaker	Topic
7:30-8 AM		Registration & Breakfast
8-10 AM	Homa Zadeh	Evidence based concepts in alveolar bone regeneration- Risk assessment, material and protocol selection
10-10:30		Break & Exhibits
10:30-12:30 PM	Sascha Jovanovic	Guided Bone Regeneration: A Step-by-Step Surgical and Biological Protocol
12:30-1:30		Lunch & Exhibits
1:30-5:00 PM	Homa Zadeh	Hands-on Workshop: GBR: Flap management, graft preparation and stabilization and suturing
Sunday March 1, 2026		
7:30-8 AM		Registration & Breakfast
8:00-10:00 AM	Tara Aghaloo	Biologic basis of bone regeneration
10-10:30		Break & Exhibits
10:30-12:30 PM	Bach Le	Practical GBR protocols
12:30-1:30		Lunch & Exhibits
1:30-3:30 PM	Bach Le	GBR Complications and management
3:30-5:00	Homa Zadeh	Live Surgery: GBR- Flap management, graft preparation/stabilization, suturing

### Course Venue:

VISTA Institute for Therapeutic Innovations

#### Tuition In-Person:

**\$1495** before December 1, 2025

**\$1695** before January 1, 2026

**\$1895** after January 1, 2026

Free with gold membership

#### Tuition - Remote (Live or On-Demand):

**\$695** before December 1, 2025

**\$795** before January 1, 2026

**\$895** after January 1, 2026

Free with gold and silver membership

### Education Format:

**In-Person:** Lectures, hands-on exercises, and live surgery demonstrations.

**Remote:** Participants will have access to all online educational material, including lectures, live surgeries, and workshops—either live or on-demand.
